Office XP	1
Office 2000	0
Office 97	0
Total	31

How To Read This Report:

System

- **Audits Completed** – The total number of times machines have been audited for

Activity	<p>hardware and software changes.</p> <ul style="list-style-type: none"> • Customer specific – The total number of times machines... (based on customer criteria). • Backups Completed – The total number of times machines have been successfully backed up.
Disk Space Used	<p>Displays the percentage of hard drive space used on either all machines or just servers. These relate to network drives or shared folders. A good status indicator is that the space used is less than 60%.</p>
Network Health Score	<p>This is a weighted average calculation that provides an <i>At a Glance</i> overall all network health score. Individual items are scored 0% (lowest) to 100% (highest). Scores are totaled, averaged and weighted to generate a percentage.</p>
Operating Systems	<p>Displays the different Windows operating system platforms installed on machines in the network. A good status indicator is that all mission critical machines or server have Windows 2000 or higher installed.</p>
Patch Status	<p>Displays the current number of patches needing to be installed on machines in the network. A good status indicator is zero un-scanned machines and a very low number of machines missing patches. Also includes number of patch scans completed and the number of patches installed.</p>
Alarm Notifications	<p>Displays the total number of each alarm notification generated. Alarms are not generally bad or good. Alarms are the result of proactive monitoring of key system elements. Alarms provide the basis for behind the scene actions that keep the network healthy and operational.</p>
License Summary	<p>Displays the total of all Microsoft Server, Workstation and Office licenses.</p>
